EU REACH regulation - SVHC contents information

In accordance with the EU REACH Regulation EC 1907/2006, Article 33, we hereby inform you that the following substances from the ECHA Candidate List are present in the products listed below at a concentration greater than 0.1% (w/w).

Product Name: Data Logger

Model Number: GL260

Application	Contained substance	Cas No.	Contents (% by weight)
BATTERY COVER	Triphenyl phosphate	115-86-6	0.30%
BEZEL			
BOTTOM CASE			
KEY TOP_1			
KEY TOP_2			
MEMORY COVER			
UPPER CASE			
Copper alloy and solder used for battery terminal and electric components	Lead	7439-92-1	MAX 1.94%
Solder for electric components on the main board	Lead	7439-92-1	MAX 3.75%
Rubber end seal of electric capacitor on the main board	6,6'-di-tert-butyl-2,2'-methylenedi-p-cresol; [DBMC]	119-47-1	0.18%
Chip resistor on the main board	Lead monoxide	1317-36-8	2.30%
Buzzer mounted on the main board	Lead titanium zirconium oxide	12626-81-2	3.37%
Lithium battery Electrolyte on the main board	1,2-Dimethoxyethane; ethylene glycol dimethyl ether; EGDME	110-71-4	2.71%
DC-DC converter on the main board	Melamine	108-78-1	3.00%
	Dodecamethylcyclotetrasiloxane	540-97-6	1.00%
	Decamethylcyclopentasiloxane	541-02-6	1.10%
	Octamethylcyclotetrasiloxane	556-67-2	1.00%
	Lead	7439-92-1	5.96%
Melamine is contained in the bobbin inside the AC adapter	Melamine	108-78-1	3.00%
Solder for electric components inside AC adapter	Lead	7439-92-1	MAX 14.45%
Chip resistor inside AC adapter	Lead monoxide	1317-36-8	0.60%
Copper alloys for power cord plug parts	Lead	7439-92-1	0.24%

Reference Information

This information, as of October 2025, is based on the latest ECHA Candidate List published in June 2025 (33th update, 250 substances).

Safe Use Instructions:

- Under normal conditions of use, the substance is chemically bound and does not pose a risk of release.
- Wash hands after handling. Store in a cool, dry place.
- Dispose of waste in accordance with local regulations
