

GL260 & GL860 Communicates with a PLC! Temperature Measurement for Environmental Test Chambers

[Industry]
Manufacturing
Production Engineering

After configuring PLC control for the environmental test chamber, use the GL860 to measure internal temperatures via PLC communication.

24-hour control and management of multiple environmental test chambers via PC

Replacement from PC to PLC

So,
we're introducing a PLC!
What's more,
with the GL860, which
supports Modbus communication,
you can control it from the PLC!

When controlled from a PC,
if an update starts late at night,
it can cause problems such as
the system shutting down...!
